

Police officers have the responsibility of protecting the public peace. They enforce laws, proactively patrol their venues, and investigate instances brought to their attention. Police are expected to respond to any situation that may arise while they are on duty. One of the lesser-known, but most time-consuming, duties of any officer is accurate and complete documentation of their activity.

**TracNet** Law Enforcement Records Management Suite is the most effective way to organize, track, and access the vast amount of information that flows through your police department every day. **TracNet** is an integrated suite of products with CAD, Mobile (OTR), Jail (JMS), and Records Management System (RMS).

## EASE OF USE

**TracNet RMS was designed for law enforcement by law enforcement.** We continuously change and upgrade features to meet the changing needs of Law Enforcement. Information is entered into the robust industrial scalable relational database using officer-friendly Windows® entry screens. Help screens are available throughout the system with the click of a mouse or by pressing one key (F1).

## SINGLE POINT OF ENTRY

At the heart of any records management system is the detailed officer's report of incidents. A report is a collection of data about the places, persons, vehicles, and/or property. In **TracNet** Records Management, all data is a *single point* of entry so there is no redundant data entry necessary, saving you time and money while increasing accuracy.

## PEOPLE

The Person File contains information about people and a history of their contacts with law enforcement. As a truly integrated system, **TracNet** automatically enters information in the Person File through:

- Crime Case (with Photos\Audio\Scanned)
- DUI's
- Traffic collisions CHP 555\556
- Bookings (with Tattoo tracking)
- Citation
- FI entry
- Business Responsible
- Pawned Property
- Licensing of bikes\guns\taxis\vehicles
- Want\Warrant
- Gang tracking \ Career Criminal
- Known Offender
- Probation Parolee
- Registrant

As officers enter information, **TracNet** automatically builds a file of Associated Persons. Each person in the Records Management System can have an unlimited number of aliases. With **TracNet**, aliases can include names, dates of birth, social security numbers, and even addresses. This means when you look up someone in **TracNet** you can easily find associated persons, photos, and aliases — a priceless investigative tool.

## VEHICLES

All vehicle information collected is automatically entered into the vehicle database and creates associations between vehicles and people.

## PROPERTY

**TracNet** allows you to maintain a record of stolen/found/lost property and evidence. Through a user-defined barcoding system, the property log tracks items in and out of the property room. Destruction orders of weapons and narcotics is a simple task of electronically moving items to a disposal bin, compiling a list and attaching it to the court order for destruction.

The system also allows for a complete audit of property, evidence, money, and narcotics:

- Maintain admissibility in court
- Storage of "special handling" items
- Identify items out to lab, court, etc.
- Tickler file for purge
- Return of property to owner/finder

### CASE INVESTIGATION

**TracNet** makes it easy to keep track of cases under investigation. Case Management functions include:

- Case investigation summary
- Case investigation activity by officer
- Cases at DA's office or outside agencies

### CITATIONS

As citations are issued, **TracNet** stores the citation information as well as information about the associated person(s) and vehicle automatically into the Person and Vehicle files.

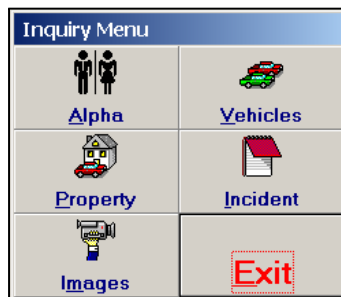

### FIELD INTERVIEWS

The Field Interview function enables your agency to assemble information and track the many daily contacts officers have in the field. All information is again automatically fed into the Person, Incident, and Vehicle files through this single point of entry.

### INQUIRY AND CRIME MAPPING

With the Inquiry function, officers can create reports based on user-defined parameters.

**TracNet** makes retrieving data easy, even with minimal or incomplete information. Find people by searching first names, alias names, or dates of birth. Locate vehicles with minimal information such as color, make, or model. With **TracNet**, you can easily search for information by victim or suspect name, incident location, case number, date of incident, officer, shift, or user-defined geographic area.

### KNOWN OFFENDER FILES

With the **TracNet** Records Management System, you can easily track a variety of

offenders, as well as other special interest groups. Address information allows data input onto area maps for crime analysis.

### ADMINISTRATION

**TracNet** enables you to keep on top of administrative functions with less paperwork like on line approvals, resulting in more efficiency. Additionally track, store, and view information relating to:

- Fees and Permits
- Bicycle license
- Gun registration
- Property
- Alarm and Responsible Person

### MONTHLY STATE REPORTS

The value of a records system is revealed by the management reports it produces.

**TracNet** produces all required State-mandated UCR reports, the California Monthly Arrest and Citation Register (MACR), and other statistical reports that track:

- Property Stolen by Classification
- Property By Type and Value
- Domestic Violence Related Calls
- Violent Crimes against Seniors
- Arsons
- Officers Killed or Injured
- Homicide Cases
- Hate Crime Report
- Anti Reproductive Crimes
- 555 Accident summaries

### REMEMBER!

Anyone can sell you a records management system. It's a major investment and results in the effectiveness of your agency. Make sure you get the service *after* purchase that you deserve.

For more than 20 years **TracNet** has been a complete suite of products that fits the automation needs of law enforcement agencies throughout California. **TracNet** will simplify your record keeping with single points of entry resulting in a distribution of searchable relational data accomplished through a full suite of products.

You spend your time with training tools to make your officers the best in the business. Let **TracNet** make your records management system another tool that supports the strength of your department – records management software that reflects the best of your officers.

**"Your records management system is the strength of your department."**
