

# Jail Management

Software for Law Enforcement

## **TracNet's Commitment**

**TracNet™**, a California based Corporation, has provided California law enforcement with effective and affordable computerization solutions for over 20 years. That is our *only* business. **TracNet** provides automation systems for Records Management with Field Reporting, Computer Aided Dispatch, with Mobile CAD, Jail Management System. Each may include Imaging, Property Bar-coding, and Regional Data Sharing. Some modules also include integration with CLETS, 911, and LiveScan.

Our goal is to provide law enforcement with successful, effective and affordable automation solutions and service.

Our commitment to only support California law enforcement agencies has allowed us to focus on State-specific requirements. All our employees have prior law enforcement experience, which enables us to maintain our goal of *outstanding customer satisfaction* and successful automation solutions in every one of our client agencies.

## **The Future of Corrections The Jail Management System**

is a graphical approach to the management of inmate movements from the time of intake through release. Behind the scene it logs each action, providing complete accounting for all inmate's movements and activities.

*This is the future for corrections information!* The **TracNet™** Jail Management module allows you to input, edit, and track: the full Booking Process, Photograph, Warrants and Charges, Property, Court Appearances, Cell Assignments, Doctor and Hospital Visits, Transfers, Transports, Visitors, Keep-Aways, Work Release, Discipline, Events, and Medical Intake.

The intuitive graphical status screen provides jail staff with visual accounting of all inmates at a glance with their current location. Alarms for specific status or general cell check provide visual reminders for Correctional Officers. Integrated Imaging is used for inmates or visitors

identification. Integrated CDL/ID Magstripe Reader reduces keystrokes during initial entry. Auto inquiry of Social Security numbers, AKA's, and previous bookings assist in proper inmate identification during intake. Inmates on electronic monitoring and "weekenders" can be easily identified, logged, and tracked.

Third party programs for commissary can be integrated into the **TracNet™** Jail Management System at user's request.

## **Easy to Use**

- ◆ Easy-to-use graphical inmate current location
- ◆ Integrated Imaging for inmates and visitors
- ◆ CDL/ID Magstripe integration
- ◆ Interactive graphical Drop and Drag inmate location
- ◆ User defined Alarms
- ◆ Automatic release dates and time credit computation
- ◆ Bail Bond Company history
- ◆ Scheduled Events
- ◆ Manual or automatic Property Box assignment
- ◆ Recommended Classification
- ◆ Flexible Cell assignment
- ◆ Visitor queue and tracking
- ◆ Inmate notes and events linked to inmate record
- ◆ Temporary Release, Weekender, Electronic Surveillance monitoring
- ◆ Social Security reporting
- ◆ Social Services Administration reporting
- ◆ VINES reporting
- ◆ Easy Schedule Event creation
- ◆ Data sharing options

**"As a business partner, TracNet has exceeded expectations and delivered on every promise. El Dorado County Sheriff's Office looks forward to continuing its partnership with TracNet Corporation."**

Phil Dold  
Sheriff's Technology Manager  
El Dorado County Sheriff's Office

**Jail Management Features:**

**Pre-Booking Information** – Booking information obtained during Pre-Booking includes.

- Inmate identity
- Arrest Charges
- Health Questionnaire
- Non-Release

**Inmate Information** – Inmate background information recorded through intuitive entry screens.

- Next of Kin/Employer
- Property
- Pre-Classification
- Medical
- Charges/Warrants
- Classification
- Housing
- Photo
  - Scars/Marks/Tattoos
  - Mugshot

**Inmate Activity** – Each inmate’s history, from initial booking through release is recorded in easy-to-use entry screens including:
