The Role of Campus Public Safety

No college campus is safe from crime. The role of a campus public safety officer is virtually identical to their municipal contemporaries. They investigate all incidents, both criminal and non-criminal, to their conclusion. They work closely with local, state, and federal law enforcement agencies as necessary in the investigation of incidents to offer a safe and secure campus.

The vision of every campus public safety department is to provide a safe and secure environment that encourages openness, trust, integrity, and respect for the differences in ideas, cultures, and lifestyles.

Campus police officers are often called on to respond and assist adjacent law enforcement officers in certain situations, and they may take action at those addresses or locations owned by the college or university or associated with a recognized student organization.

Jeanne Clery Campus Crime Statistics Act

Like their counterparts, the requirement to fully document all incidents is critical. Landmark federal law requires that every university that maintains a police or security department of any kind is required to make, keep, and maintain a daily log, written in a form that can be easily understood, recording all crimes reported to such police or security department, including the nature, date, time and general location of each crime and the disposition of the complaint. The law requires that this initial information be open for public inspection within two business days of the report of the crime unless the release of the information would jeopardize an ongoing investigation, cause a suspect to flee, or result in the destruction of evidence. Because the law is tied to participation in federal student financial aid programs, it applies to most institutions of higher education. both public and private, and is enforced by the U.S. Department of Education.

Affordable Incident Reporting

Are you looking for an affordable answer to your incident reporting problems? *TracNet*™ provides you with all the essentials for accurate and dependable incident reporting in an easy-to-use intuitive format. We recognize the need for the functionality and sophistication of a Records Management System in modules that are effective and affordable. *TracNet*™ is designed by law enforcement for law enforcement, specializing in providing comprehensive, integrated, public safety automation solutions on the leading edge of technology.

Four Integrated *TracNet*™ Modules:

- **CAD** (Computer Aided Dispatch) with GEO address verification, CLETS Integration, and E911 Integration.

- **RMS** (Records Management System) with criminal and non-criminal reporting, FI, Traffic collision reporting (CHP 555 or 556), Licensing (Guns, parking, Bicycle, etc.), Fees, Bar Coding of property, integrated Photo Imaging (images with crime cases), Clery Reporting, Multi-jurisdictional data sharing.

- **JMS** (Jail Management System) booking module with booking image and tattoo tracking, automatic California drivers license reading, automated MACR and UCR reporting, data transfer to Livescan fingerprint integration.

- **Mobile** (Mobile Field Reporting) with automatic upload to RMS, wanted flyer creation, crime mapping, and more…

Information Where and When It's Needed

The *TracNet*™ Records Management System searches through massive quantities of

information to provide officers in the field with the information they need (and only the information they need) displayed in a meaningful format. The process of entering information and making inquiries are integrated, so that the process of storing and retrieving information about all previous contacts with people, vehicles, locations, or property is fast and easy, with no wasted time and effort.

Simplicity is important

In today's world, crime analysis and information delivery—to the right people at the right time—play a critical role in maintaining calm and order. Law enforcement agencies at all levels must have mechanisms for securely sharing and protecting critical information, ensuring legislative compliance, and meeting the needs of a real-world environment through industry-proven tools. By aligning IT resources with agency objectives, you can improve resource deployment, simplify systems management, and straightforwardly administer technology. To that end, **TracNet**™ software has been serving California law enforcement with CAD, Records Management, and Mobile modules suite since 1986 through its integrated software.

Client Server

TracNet™ systems use powerful, reliable client/server technology. Client PCs and laptops use the familiar and easy-to-use Microsoft Windows™ user interface. Servers are based on a powerful, IBM 64-bit, scaleable industrial server selected for its reliability, speed, power, and security.

CAD - Computer Aided Dispatch

- GEO File Support
- E911 Interface
- Integrated Mapping support
- CLETS Interface
- Command Line Support
- Simple drag and drop interface
- Integrated to the RMS

JMS - Jail Management Systems

- Booking Photos\Marks\Scars\Tattoos
- Visitation Tracking
- Security Classification
- Inmate Movement tracking
- Sentencing and DSS Interface
- Livescan interface
- Multiple facility management
- CDL/ID Mag-strip swipe entry
- Auto prompt for violations
- SSA Interface\VINES Interface
- Automated DOJ E-CARS MACR support

RMS - Records Management

Modules Included

- Crime Case
- DUI
- Traffic collision CHP 555\556
- Booking with Tattoo tracking
- Citation
- Parking Citation
- Clery Reporting
- Multiple FI entry
- Business Responsible
- Pawned Property
- Licensing of bikes\guns\taxis\vehicles
- Want Warrant
- Gang tracking \ Career Criminal
- Known Offender
- Probation Parolee
- Registrant

Crime Cases include:

> *"TracNet's goal is to provide California Law Enforcement with successful, effective, and affordable automation solutions and service."*

- Case Solvability
- Case management
- Bar Coded Property
- Crime analysis
- Crime Mapping
- Line Ups
- Case to Court Tracking
- 293 PC compliant printing
- 964(b)PC compliant printing
- Notify of images at printing
- Notify unapproved case printing

Most Modules Also Include:

- Integrated Images
- Audio Attachment
- Scanned Documents
- Fee Tracking
- False alarm billing module
- Case approval holds
- Numerous data analysis reports

Mobile Solutions for RMS & CAD

- RMS entry, inquiry
- CLETS Interface
- Integrated Mapping support

Ease of use with

- Automatic CDL/ID reading
- Livescan integration
- City–street tables
- Auto-fill crime validation table
- Multi-jurisdictional data sharing
- CA DOJ E-CARS Plus (MACR and UCR)
